The screenshot shows the 'Identity Authentication System' (上网认证系统) interface. The main heading is '二维码认证' (QR Code Authentication). A progress bar at the top indicates two steps: '1' (filled) and '2' (empty). Below the progress bar, the first step is labeled '填写个人信息' (Fill in personal information) and the second is '担保人扫描' (Guarantor scan). Two input fields are visible: the first contains the number '13000000000' and the second contains the text 'test'. A blue button labeled '下一步' (Next Step) is highlighted with a red rectangular border.

4.

The screenshot shows the same 'Identity Authentication System' interface. The progress bar now shows step '1' as empty and step '2' as filled. The label '担保人扫描' (Guarantor scan) is now active. A large QR code is displayed in the center of the screen. A blue button labeled '上一步' (Previous Step) is visible at the bottom.
